

Regional Planning Results: Quick Fixes

More training/better documentation/more communication

Fix the communications module – bring it to an acceptable current level

Improve system performance

Additional functionality:

CE/CT

Shopping Carts

eTranscripts

Registration Edits

True HR functionality

Budget Module

Assessment Data Loading

Student Life

Career Services

Graduate Students

International Person

eTimecard

ePurchasing

eFaculty functions

3rd Party Billing

Online 1098 Ts

Email integrations – confirming transactions like registration with email

Start working through User Groups priorities - the #1 student user group priority has yet to be touched after three years in the #1 slot

Add security levels – more granularity – something in between view only and change everything security levels

Align Business Practices – become a system

Error notification/reporting to users when processes fail and better/more descriptive error messaging

Human language screen and report names

Look and feel: The system looks like 1970s DOS systems

DARS integration with Financial Aid and other ISRS processes

More Help Desk Hours, Better/Faster responses

Unique system ID

3rd Party (parent, employer) proxy access

Autofill/other technology features to maximize productivity and reduce data integrity issues

More faculty access to appropriate student information
