

WFP Conference Room Wireless Capacity

Each Floor has 2 Access point positioned in different areas.
Each Access Point can handle about 20 connections at one time.

Most areas have the Access points overlapping which in turn would provide additional access at one time in a single conf room.

The more connections at one time will cause slow response time depending on the amount of data going back and forth. We will continue to work with staff using the wireless to improve areas as they come up with speed and connection problems.

2nd Floor:

Access Point “**WFP2North**” is located just outside the restrooms.
Access Point “**WFP2South**” is located just outside conference room 2214.

Both these access points will overlap each other.

Conf2203 could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Training room 2204 could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location area.

Conf2214 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

***Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
Special circumstances could allow for 40 wireless connections in one area if planned appropriately. The rule should be 20 tops for any gathering in this area. (These areas can not hold large meetings and should be fine with whatever they are doing.)*

3rd Floor Tower

Access Point “**WFP3AEast**” is located just outside Conference Room 3309.
Access Point “**WFP3AWest**” is located just outside the cube 117.

These Access Points do not overlap a lot.

Conf3309 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf3310 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf3338 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

***Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
(Special circumstances could allow for 20 wireless connections in one area if planned appropriately. The rule should be 15 tops for any gathering in this area. This will still allow access for other groups at the same time.)*

3rd Floor Atrium

Access Point “**WFP3BNorth**” is located just outside Conference Room 3304.

Access Point “**WFP3BSouth**” is located just outside cube 3077.

These Access Points do not overlap.

Conf3304 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf3306 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf3355 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf3362 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Training Room 3354 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

*** Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
(Special circumstances could allow for 20 wireless connections in one area if planned appropriately. The rule should be 15 tops for any gathering in this area. This will still allow access for other groups at the same time.)*

4th Floor

Access Point “**WFP4North**” is located by the south end of the Board room.

Access Point “**WFP4East**” is located in Conference Room A.

These Access Points overlap a little bit.

Board Room could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

ConfA could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

ConfB could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

WorldTrade Room could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

*** Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
(Special circumstances could allow for 40 wireless connections in one area if planned appropriately. The rule should be 20 tops for any gathering in this area. This will still allow access for other groups at the same time.)*

5th Floor

Access Point “**WFP5East**” is located at the east end of the elevator bank.

Access Point “**WFP5West**” is located by copy area 5162.

These Access Points overlap.

Conf5521 could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf5522 could handle about 40 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

*** Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
(Special circumstances could allow for 40 wireless connections in one area if planned appropriately. The rule should be 20 tops for any gathering in this area. This will still allow access for other groups at the same time.)*

6th Floor

Access Point “**WFP6North**” is located by copy center 602.

Access Point “**WFP6South**” is located by Conference Room 6616.

These Access Points overlap a little bit.

Conf6616 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

*** Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
(Special circumstances could allow for 20 wireless connections in one area if planned appropriately. The rule should be 15 tops for any gathering in this area. This will still allow access for other groups at the same time.)*

7th Floor

Access Point “**WFP7East**” is located by Conference Room 7710.

Access Point “**WFP7West**” is located by office 739.

These Access Points overlap a small amount.

Conf7710 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf7712 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

Conf7703 could handle about 20 connections at one time if no other groups of staff are using the wireless at the same time in another location in this area.

*** Anyone planning a large meeting and expecting a lot of staff using the wireless whether it is STARLAN or WFPWireless will need to check to see how many other meetings in the area are going on at the same time.
(Special circumstances could allow for 20 wireless connections in one area if planned appropriately. The rule should be 15 tops for any gathering in this area. This will still allow access for other group at the same time.)*
